Subject: Fw: Passaic River FFS Appendices for review

Also looking for internal EPA review by August 12. Please let me know if you would rather I send you the appendices directly so you don't have to go through PREmis.

Marian and Chuck: The Risk Assessment Appendix is expected to be available for internal EPA review by tomorrow or Thurs. The date below gives us a little time to review first before it goes to the rest of the agencies (if necessary).

Subject Passaic River FFS Appendices for review

This is to let you know that five of the Appendices to the Passaic River Focused Feasibility Study are available for 6-agency review. They are posted on the PREmis Digital Library, under the folder "Superfund and WRDA Project Deliverables/Final FFS/Agency Release Version" and are the following ones:

Appendix D - Principal Threats Memorandum
Appendix E - Engineering Memoranda
Appendix G - Cap Erosion and Flood Modeling
Appendix H - Dredged Material Management Assessments
Appendix I - Dredging Volume Estimates

I hope you will find that we have made a large effort to address your comments from the draft FFS of June 2007. This review is to enable us to finalize the FFS for public release by September. I am requesting any final comments you might have on these appendices by August 12.

If you are wondering about progress on the other appendices, here it is:

Appendix A - Comprehensive CSM: Peer reviewed in June. Appendix needs to be revised to incorporate

peer review comments.

Appendix B - Sediment TBCs & Development of PRGs: Being revised. Available for 6-agency review by end of July.

Appendix C - Risk Assessment: Being revised. Available for 6-agency review by end of July.

Appendix F - Navigation Studies: Being revised. Available for 6-agency review by the end of this week.

Appendix J - Cost Estimates: Being revised. Available for 6-agency review by the end of July.

The main text of the FFS is being revised and will be available for 6-agency review by mid-August.

Let me know if you have any questions.
